

To School Parents and Students

August 2014

Page 2

As part of the Management Plan, periodic surveillance and three year re-inspections will take place to maintain a current inventory of the locations and condition of the asbestos containing materials.

In order to assist your school and the Archdiocese in the maintaining the protective covers on the existing asbestos materials and reducing risk of exposure to students and school staff, we request that students not damage any material labeled as containing asbestos and do not enter areas with signs warning that asbestos is present. In the case of younger students, we request that parents discuss the importance of not disturbing any material marked with asbestos warning labels.

The Archdiocese is committed to a program to reduce the risk of exposure to our students from airborne asbestos. We appreciate your help in our efforts to maintain a safe and healthy environment in our schools.

Sincerely yours,

Principal

Ms. Maureen Huntington
Superintendent of Catholic Schools
Archdiocese of San Francisco
Catholic Schools Department

Pastor

Steve Kalpakoff
Director of Building & Construction
